THE FUTURE BELONGS TO THOSE WHO MASTER IT.

Mastercam

VERISURF
3D Measurement Solutions

For over 30 years, QTE has been a nationally accredited and award-winning reseller of Mastercam software for the CAD/CAM manufacturing markets. We also know Verisurf inside and out. We take this unique expertise and apply it to solve the issues you face on your machine shop floor. What you get is what you've been looking for, including improved speed, increased automation, and the delivery of efficiency for all your jobs.

We can also train your machinists or act as an extension of your team. QTE is here for you when you need us. In fact, we're here for you right now with our ongoing technical support and so much more. That's why we're masters of Mastercam and Verisurf.

OPTIMIZE YOUR MASTERCAM SOFTWARE TO GET EVEN MORE OUT OF YOUR CNC MACHINES.

IT'S LIKE GETTING 26 HOURS OUT OF A 24-HOUR DAY.

Call us to learn how additional Mastercam modules can help improve your efficiencies.

Core Products:

- Mastercam Mill
- Mastercam Mill 3D
- Mastercam Lathe
- Mastercam Router
- Mastercam Wire
- Mastercam Design

Advanced Modules:

- Advanced Machining
- Multi-Axis
- Mastercam for Solidworks®
- Mill-Turn
- Machine Simulation
- Swiss Machining

Productivity Add-Ons:

- Mastercam Art
- Productivity+™
- CAD Translators
- MoldPlus
- Blade Expert
- Port Expert
- Verisurf

As a manufacturer, you're already two steps ahead of the competition because you use CNC machines that run off Mastercam software. Now imagine the growth potential by optimizing your existing Mastercam software that can turn a CNC machine into an ROI dream machine.

The QTE approach to Mastercam optimization includes making sure all the software on your CNC machines is up-to-date with the latest features. In addition, our application engineers take their in-depth Mastercam software expertise, and applicable manufacturing experience, and transfer that knowledge to your team. It's how we sync man with machine.

Now everyone on your shop floor is working smarter, not harder, to achieve faster throughput, higher machine utilization and reduced material waste. Because QTE knows you have zero tolerance for anything less than a perfect part.

BENEFITS OF MASTERCAM OPTIMIZATION

- Achieve more efficient machine utilization for faster output, and open up new markets, since you're using the latest enhancements in Mastercam software
- Gain a competitive edge against other machine shops going after the same projects
- Increase the value of your own programmers, while keeping your team up-to-date on Mastercam features
- Utilize every aspect of CNC and inspection/metrology technology
- Increase efficiency, reduce cycle times, and keep programming time to a minimum
